

Version: July 2024

**Show: *Hermit***  
**Simone de Jong Company – The Netherlands**

Technical details: see the attached light plot and drawing

**Please: 2 technicians are required.**

**Stage setup time: 2,5 to 3 hours**

**Build-down time: 1h 15 minutes**

**Light:**

Some details about the drawing.

- The 4 profile spots **11-12-15-16** must be **50° (degrees) and 1 kw** for the use of gobo's plus holders: size: 85 mm B-size Rosco
- Profile spots **13 and 14 (38°) 1 kw** with diaphragm
- The 2 Fresnel spots must be on floor stand on the stage floor, left and right with barn doors
- The public lights must be operated on the light board; this is part of the show.
- Color filters (gels) Lee: 101-104-105-106-119-139

**Sound:**

- PA (sound for public) and 1 monitor box in the middle behind stage.  
Note: PA and monitor box must be **operated separately.**
- The sound will be played through a laptop (MacBook) with minijack output

**Stage:**

- minimal space; 6m depth x 8m width (negotiable)
- flat floor (same level as public) (negotiable)
- black all around (curtains or otherwise)
- the floor must be smooth, otherwise a black ballet floor is required. **(a smooth floor is essential for the performance)**
- Note: the decor is a box (the home of Hermit) which has felt studs and must be able to slide on the (smooth) floor.

**Operation table: for light and sound.**

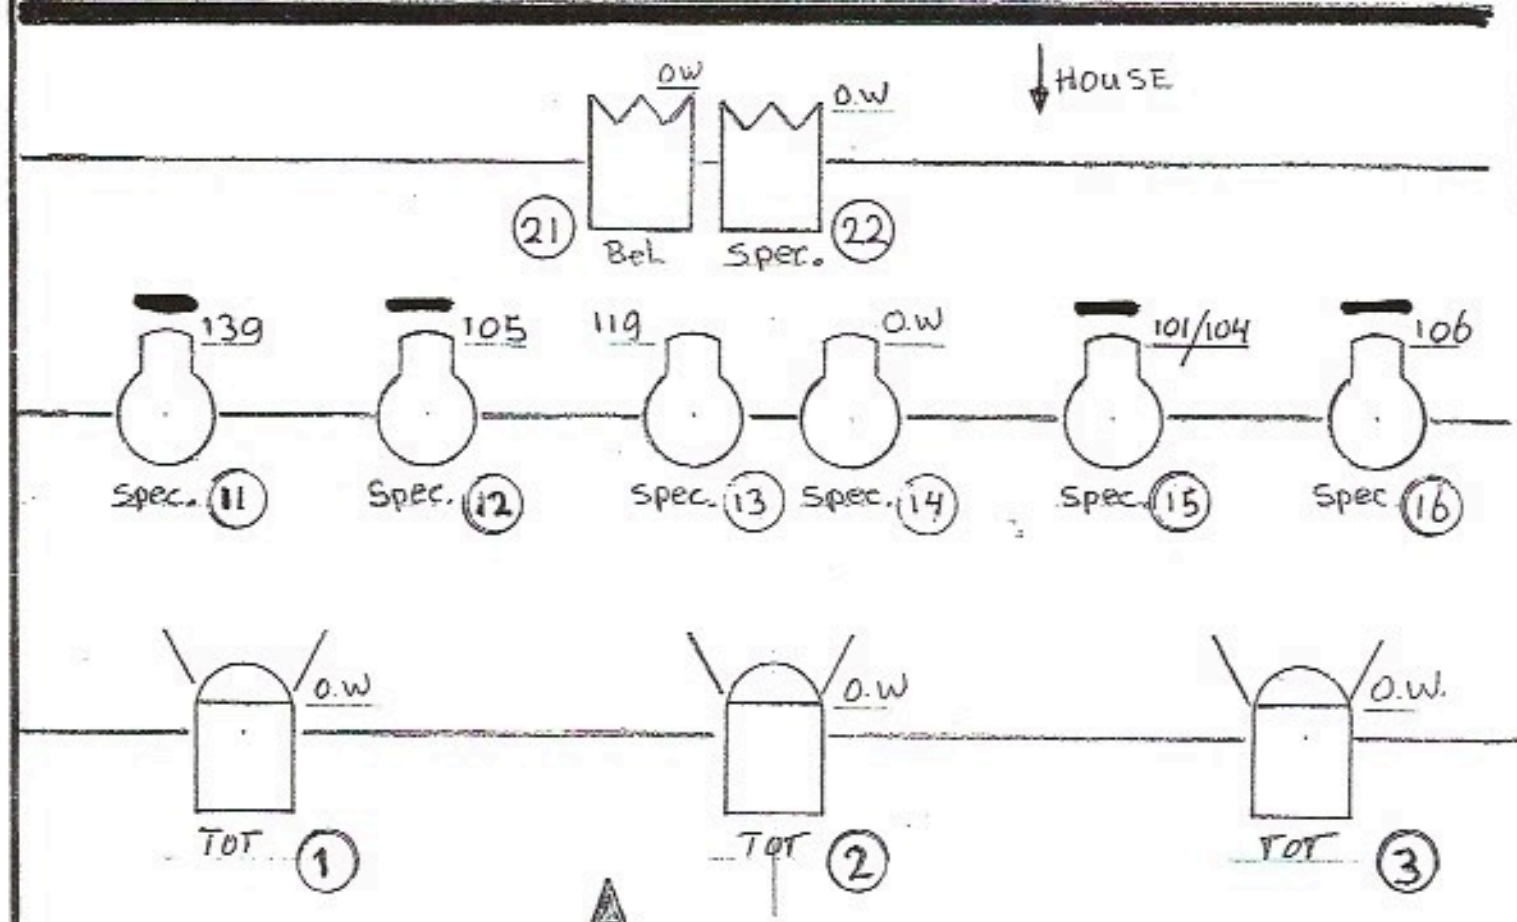

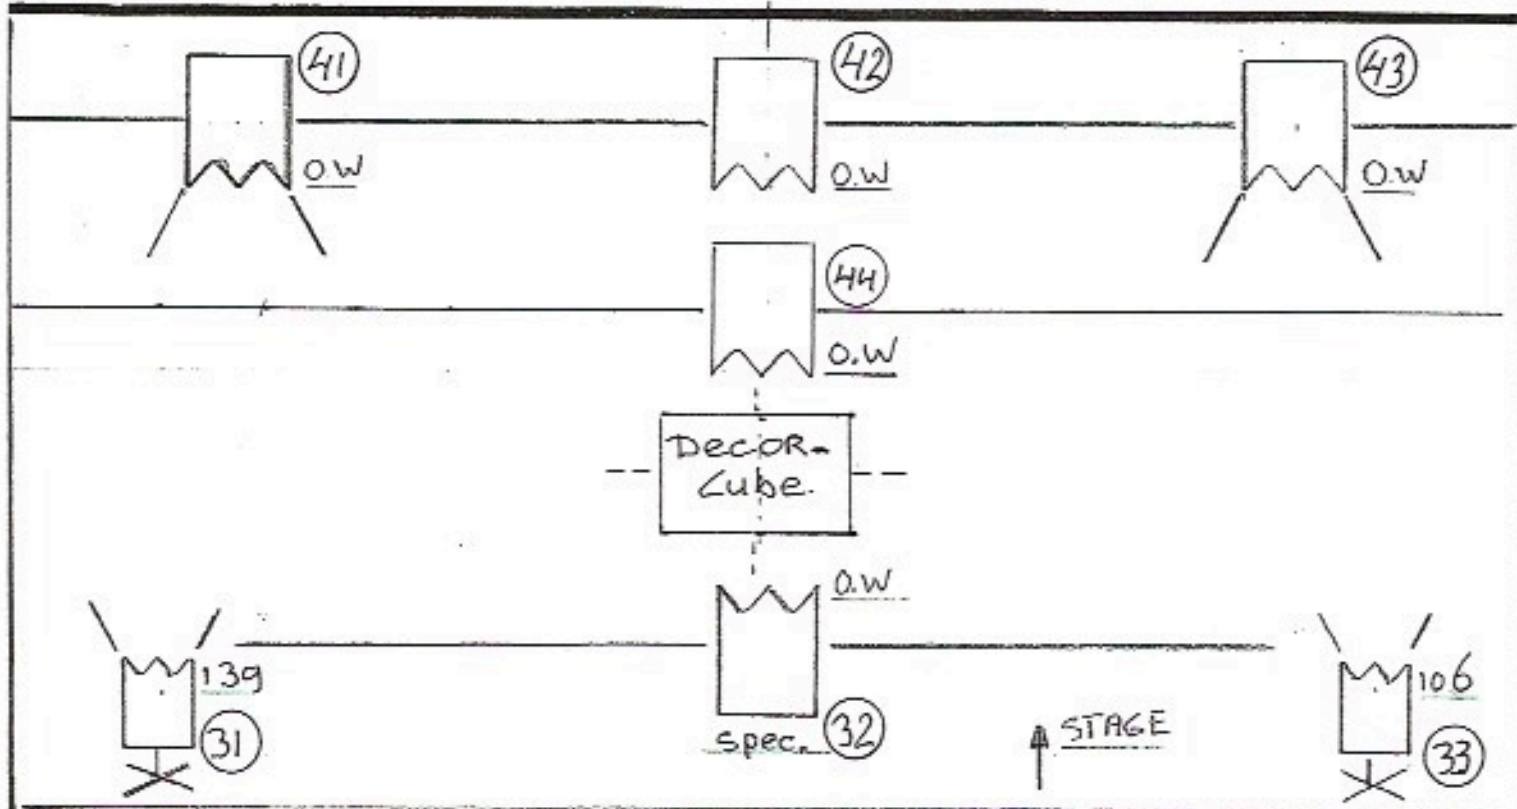

Please, sound board, light board and laptop next to each other, with 2 (blue) reading lights.

If possible, please place pillows in front of the front row, for the little children.
