Black ballet floor: Yes
Video or projection: No

Contact:

Thijs Felperlaan mimewave@gmail.com 0031-6-46012678

The actors will build the set themselves and act as their own technicians. Support with unloading and construction is required. Please prepare the lighting plan as much as possible. During the performance, an electric guitar will be played.

Technical crew theatre: 1
During performance: 1
Set-up time: 1,5 hours
Strike time: 45 minutes

We ask the technician of the house to operate the light during the performance.

Sound:

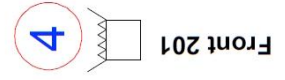

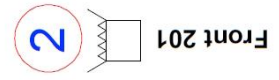

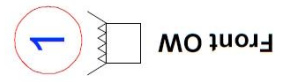

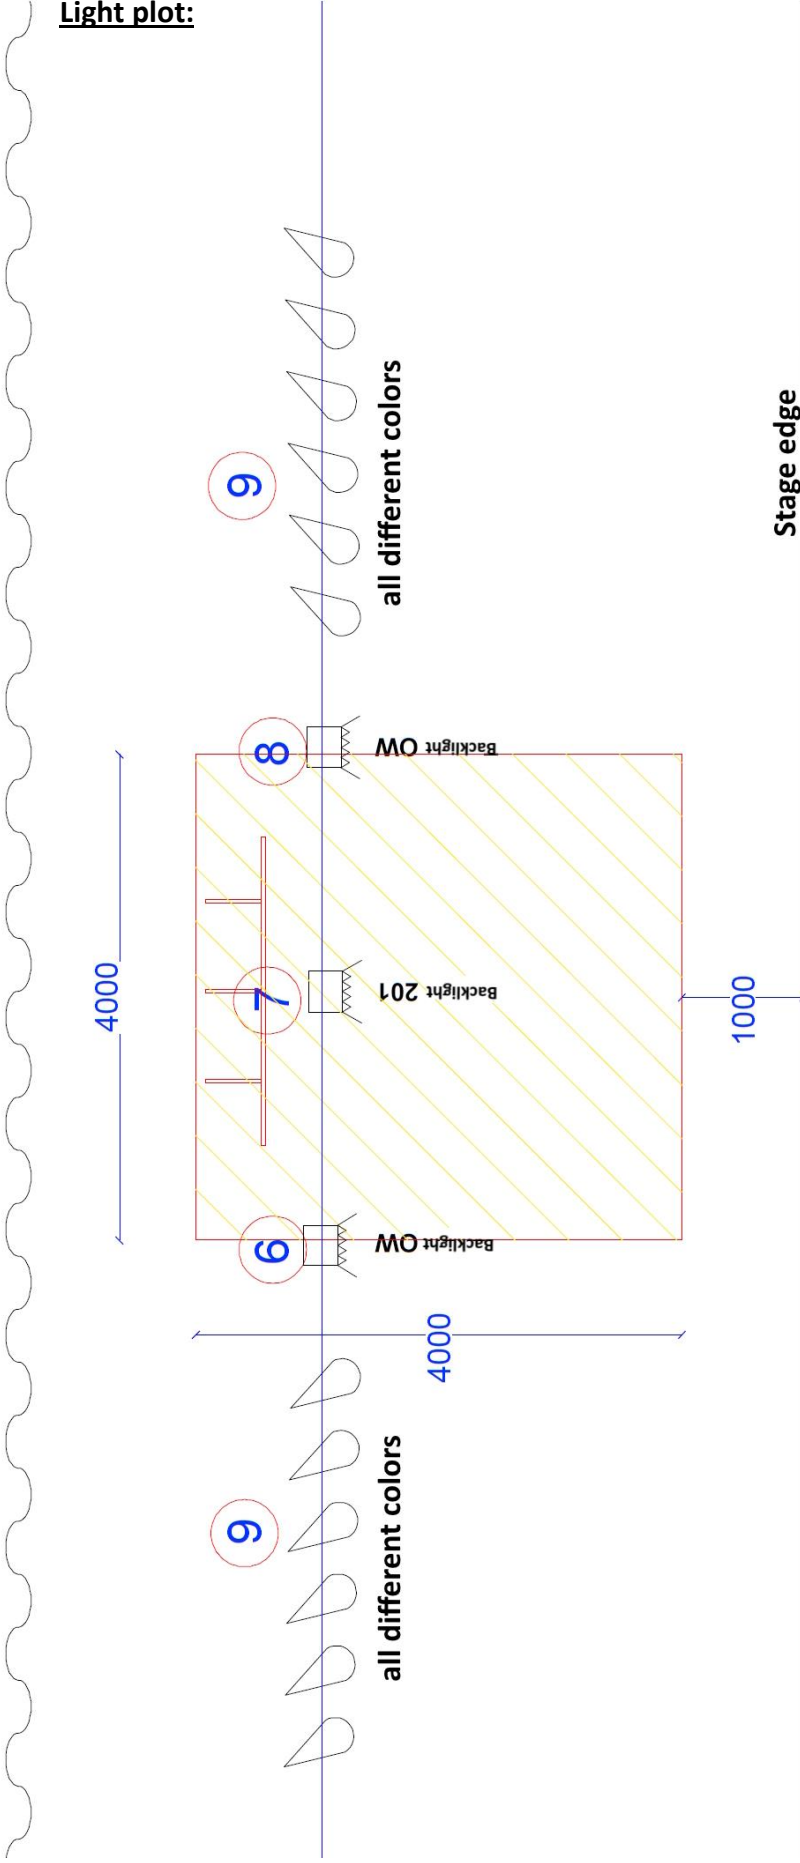

- We have a guitar amp (does not need to be miced out) that requires 1 power point, right back of the playing surface.
- All other sound of the performance is acoustic.
- We'd like the house technician to turn on outdoor music. For this we have our own MP3 player that requires a mini-jack connection.

Set:

The decor consists of a yellow floor of 4 by 4 meters that will be placed on the ballet floor. Behind this is a yellow wall consisting of loose pieces that are put together.

Light plot:

Light plot Yellow
