Max. audience 60 people or more in mutual agreement

Minimum age 3 years

Setup about 1.5 hours

Strike about 30 minutes

Show 35 mins

Actors 2

Production manager 1

Technicians from your theatre 1

Playing area 4 x 4 mts

Height 2.5 mts

Light We need a well-lighted room. In a theater venue we use a simple general theatre light, front, back (open white) and also the audience seats should be lighted.

Sound Please make sure there is no noise to be heard from the surrounding rooms during the show.

Set specification A flat of 1,20 x 1,80m and a few props. From the lobby to the hall a route (small red pieces of gaffa tape) will be made to follow for the audience. We would like to tape the route they need to follow from the audience reception area to the entrance of the venue.

Audience Should be seated on cascading seat rows for a good line of sight. The seat row should not be wider than 8 meters if possible. The set up should be near the audience for intimacy. If available in the location or venue some little children can be seated on cushions on the ground in front of the set up.

Other requests Dressing room for 2 actors.

A small round black trash can (strong enough to stand on).

Transport

If the set and props need to be transported by plane the size and weight are approximately:

The case the set is transported in: 78,4 cm high, 66 cm broad and 39,4 cm depth, weight ca. 35 kg.

The case props are transported in: 76 cm high, 46 cm broad and 28 cm depth, weight ca. 12.5 kg.

Costumes will be brought along with personal luggage.

Director/set designer: Willemijn Zevenhuijzen

Actors: Lisa Groothof and Dwayne Toemere or Yannick Greweldinger
