GENERAL INFORMATION

Dadodans mainly uses technical facilities of the company. With the exception of a black ballet floor (see below).

Performing area: Very minimum 10x10 meters. Stage on stage.
If sizes of stage differs, please contact us. The measurements of the playing surface dictates the max capacity of the theatre space (80/100 max).

Floor: Black ballet floor (provided by the venue): the black ballet floor needs to cover the whole space.
The floor needs to be suitable for dance, so no concrete floor!

Scenography: Gray floor 10x 10 meters, hanging balloon on a rail, mirrored floors (2 circles), 1 rail, 2 tripods for lights in 2 corners of the stage. Several cushions and stools for the public.

Important: The height of the theatre should be at least 4 meters.

Scene images:

LIGHT

Dance company Dadodans uses their own light facilities.. We take our own lights and light table.

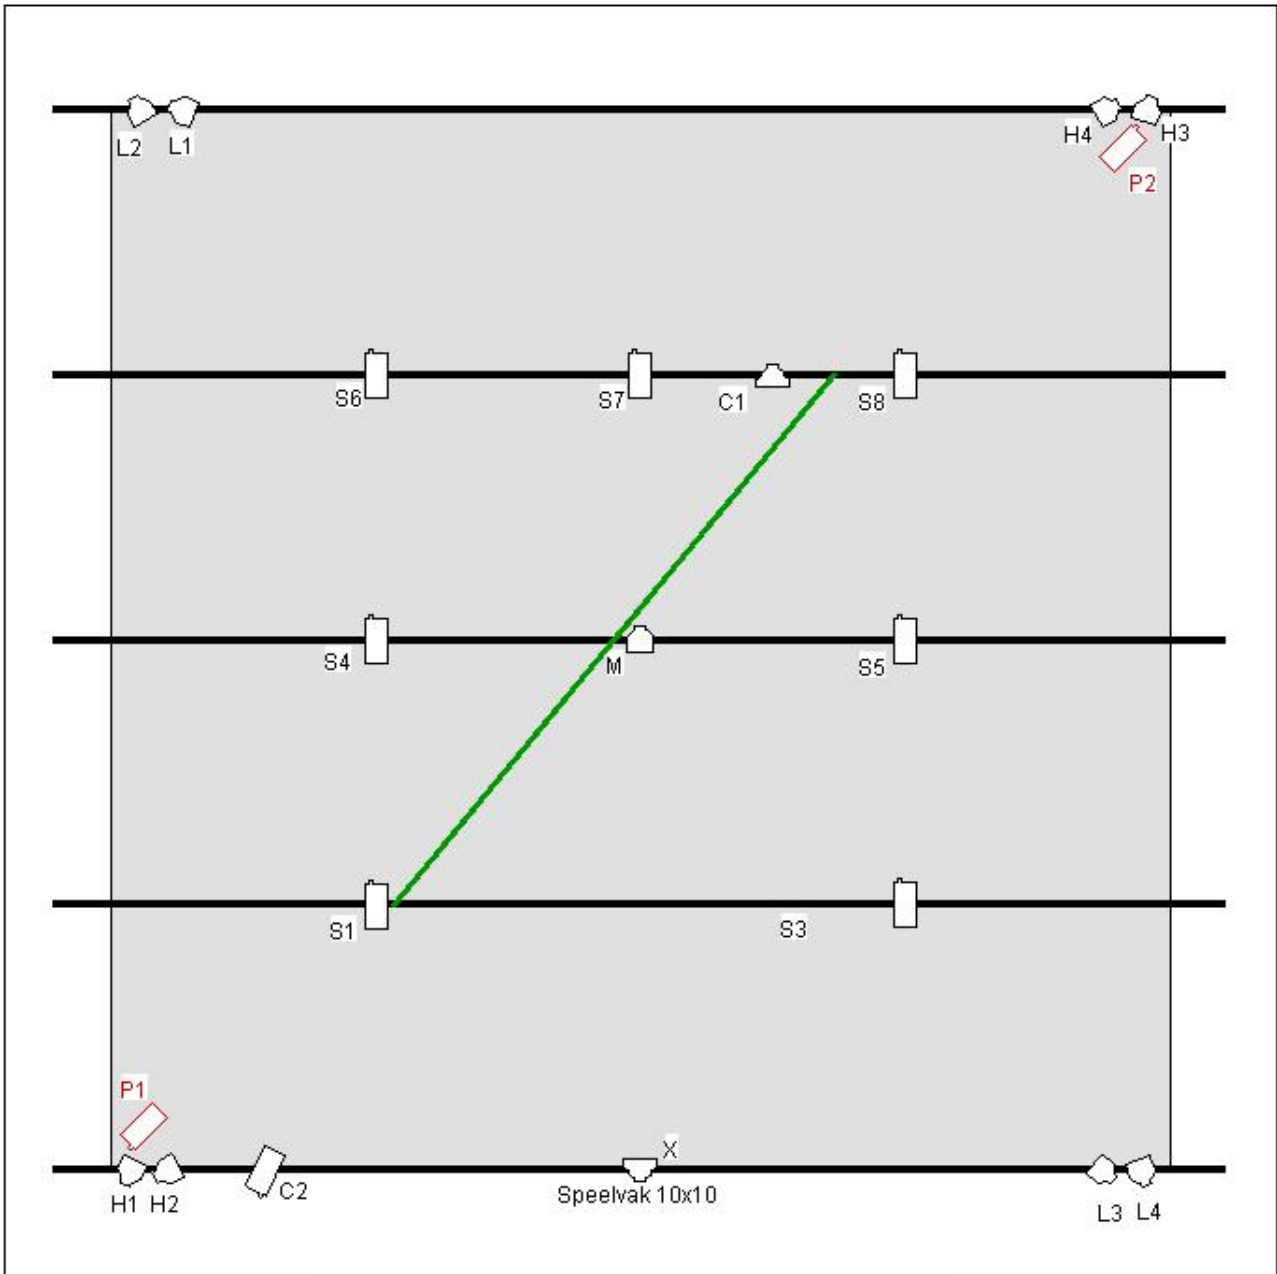

SOUND

There will be live music, no audio system from the theatre is needed.

PUBLIC

SETTING : The public will sit around the grey floor.

AUDIENCE ENTRANCE: When doors open, there will already be dancers on stage. Therefore we would like to open the doors as late as possible.
